

## Product Details

Bullet Type	9x19mm
Weight	124 Grain
Jacket	Brass (CuZn30) or GM (CuZn10)

## 124 Grain 9 MM FMJ Bullet

DKC 9MM Brass Cases are proudly made from the recycled materials to provide exact performance with every shot, repeatedly. We produce high-value-added products in NATO Standards, from the lead-containing materials that we recycle to support prevent pollution and a healthier environment. We use a DKC 9 MM Lead Core in manufacturing DKC FMJ Bullets on a 4000 square meter site with more than 100 employees. All the DKC Lead Cores have identical shape and weight thanks to cutting-edge technology we provide. DKC FMJ Bullets are easily collated by the feeders of the bullet presses due to their symmetrical shape and encased in hard metal for jacketing.

Development produces a smoother bullet with a more precise diameter and a smoother surface for better shooting experience and better-looking bullets. DKC Projectiles combine excellent material properties and finely tuned design innovations to deliver exceptional target energy with maximum weight retention. Certified with ISO 9001:2015, ISO14001:2015, ISO45001:2018, and compliant with NATO standards the high quality of DKC's products fulfills the requirement of the most demanding Defense Forces worldwide. Strike your target with DKC Brass & Projectiles' 124 GR. 9MM FMJ Bullets.

A great choice for an all-around ammo-smiting experience.

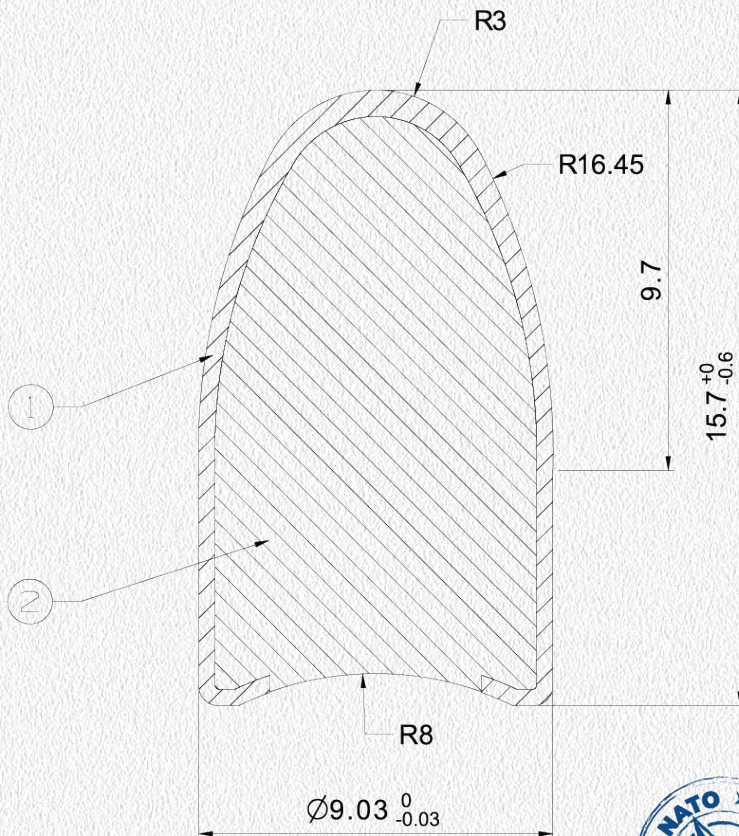

# 124 Grain 9 MM FMJ Bullet

## Tech Specs

Diameter	9x19mm		
Weight	124 GR., 8,03 g		
Sectional Density	0.141		
Lead Core	Lead - Antimony Alloy (2% Sb)		
Ballistic Coefficients and Velocity Ranges	120 @ 1250 fps and above . 160 between 1200 and 1000 fps 175 @ 1000 fps and below		
Tolerance Level	(0.5-3)mm measuring range	(3-6)mm measuring range	(6-30)mm measuring range
	fine	±0.05	±0.05
	medium	±0.1	±0.1
	coarse	±0.2	±0.3
General Tolerance	ISO 2768 - f
